

KEY

- BIKE HOOPS
- COVERED BIKE HOOPS
- BIKE LOCKERS
(Available only through advance rental through getdowntown.org)
- AATA BLAKE TRANSIT CENTER
(Get current routes/schedules or visit theride.org)
- Suggested Bike Route - road which has either wide lanes, low traffic volumes, or low speed
- Marginal Bike Route - good road route with problems at peak hours

PARKING YOUR BIKE

When transitioning from the roadway to the sidewalk to park your bike, remember to signal properly, dismount or slow down considerably once on the sidewalk and walk your bike to its parking space.

Please use the designated bike hoops when locking up your bike. Attaching your bike to a tree, sign, fire hydrant, or non-designated meter post could result in damage, accessibility issues, or even an easily stolen bicycle.

A U-lock has proven to be the most secure option for locking your bike. Be sure to anchor both your frame and wheel to the bike hoop, filling the "U" of your U-lock.
